

Hey again to all you guys at Capilano University! , It's Kevin; I am running for the educational committee issues chairman. I have been studying at cap for last 2 years. So far, it's been a fun journey.

I am glad if you're undergoing the real college experiment, and; well I am sad if you haven't had a chance to get settled in yet. I got a feeling telling me it'll all work out for you.

I would like you guys to take a moment and look at it, I keep trying and pressing my luck, doesn't matter how hard it is. The goals that I am running are key factors that are beneficial for all Capilano's students. Again, I do NOT garranty anything. No one can, if they do, that's a LIE.

Goals are dealing with lowering the tuition fee, making sure every single student gets almost the same time ticket to sign up for classes, supporting people at school for greener and more organics. Also, find way so that every student at cap can start lunch at 11:30 ish, rather than having a lot if students going to class. Running educational festivals has been another goal through my platform to grow the social life a little more at Capilano. By that, I more mean to run festivals that having drawing, singing and dancing contests. Something that really pumps students up that I believe that's a huge part of going to college or university.

To close, I hope all the students at Capilano have a fantastic, fun school year. Wish you a good luck through the elections. Make sure that you'll vote for the one that deserves.

***GOOD LUCK***
